How does Rheumatoid Arthritis affect your eyes?

Drs. Tina Escobedo, Michael Finley, Robert Gordon, Eric Lee, Dat Trinh, and Jasmine Yumori are conducting a study looking at how rheumatoid arthritis affects your eyes.

- An eye doctor will do an extensive evaluation of your tear layers and of the front surface of your eyes; 30-60 minutes.
- A blood sample will be taken to measure the levels of inflammation in your body.
- We will explain all of our results to you and can share recommendations on how to keep your eyes healthy.
- The exams and laboratory studies in the study will be done at no cost to you.
- We will compensate $25 at the end of the study for your time.
